ACBM GLOBAL LAUNCH ANNOUNCEMENT

ARIE CAPITAL GROUP, THE VENTURE CAPITAL INVESTMENT FIRM, ANNOUNCES THE GLOBAL LAUNCH OF ACBM, THE FIRST FULLY-REGULATED NATIVE DIGITAL INVESTMENT & BUSINESS BANK IN THE WORLD

Extensive real-world compliance and regulatory testing have been completed since its foundation in 2019. Today **ACBM** serves its clients via a cost-efficient, digital banking platform devised specifically to support the needs of large and small businesses, multi-entity corporations, family offices, high-net worth individuals and investors.

ACBM's proprietary digital platform allows for stand-alone multi-entity, multi-account, multi-currency management within one simple and convenient dashboard. Importantly, this flexible and robust operating system meets the complex compliance and regulatory demands of today's cross border trade. The focus is on providing regulated, multi-jurisdictional capabilities to support cross-border transactions, investments, and international banking.

Key features of **ACBM's** services are:

- Rapid onboarding of new clients via automated KYC platform while meeting tough compliance standards
- Fully regulated and flexible cross-border multi-national capabilities
- Scalable platform to enable clients to control multiple accounts
- Hands-on expertise in Investment Advisory, M&A, Asset Finance and Alternative Asset Management
- Practical and intuitive interface based on unique proprietary modular software architecture
- Fully proven, robust technology to secure client privacy and transaction monitoring
- All of the above without compromising on a high-quality service with active human interaction

Following today's announcement, Simon Tobelem, Group CEO, said: "A significant part of the cross border business market is underserved by the traditional banking institutions. Ever-increasing complexity of compliance requirements, along with rising transaction costs and obsolete technology, which is not fit for purpose, are leaving mid-market corporates in particular without a proper solution. **ACBM** fills that gap."

"**ACBM** is part of a rapidly-changing global business landscape. Our fresh approach to banking, KYC and cross-border transactions has already enabled clients to onboard within a fraction of the time of a traditional bank and also to transact with zero disruption. During the Covid-19 outbreak **ACBM's** services have remained fully operational, demonstrating resilience, efficiency and reactivity even during the toughest moments of the lockdown."

Sir Mick Davis, Chairman of ARIE Capital and **ACBM**, said: "**ACBM** offers a much needed solution in the banking space where ongoing complexity and the cost of doing business inhibits many enterprises from realizing their potential. The proprietary platform will make **ACBM** a partner of choice for many who are seeking efficient and cost-effective transaction solutions."
